Philip Lee

Full-stack developer

SUMMARY

Final-year software development student at KCA University. I built the website and the staff inventory system for FRACA SERVCOM, a business that has traded since 2001. I am looking for a software development internship at Elevate Credit Africa.

SKILLS

Back-end	PHP, Laravel 12, Node.js, Python, Java
Front-end	JavaScript, React, HTML, CSS, Bootstrap 5
Data	MySQL, PostgreSQL
Other	REST APIs, role-based access, PHPUnit, Git, GitHub, Vercel

EXPERIENCE

Web developer, FRACA SERVCOM Ltd

October 2026 – Present

Eldoret, Kenya

- Designed, built and deployed the company website, and I maintain it.
- Built the inventory and sales system. It is with the board for approval.

ICT attachment, Business Registration Service

Five-month attachment

Nairobi, Kenya

- Helped design an asset management system for the organisation.
- Compared a few existing systems, then prototyped the screens in Figma and Adobe Illustrator.

PROJECTS

Inventory system, FRACA SERVCOM

With the board for review

Laravel 12, PHP, MySQL, Bootstrap, PHPUnit

- Staff system for sales, stock, purchasing and the day's totals, with 47 API endpoints.
- A sale can stay pending. Stock comes off only when it is completed, and the system will not sell more than is on hand.
- Takings are split into cash, M-Pesa, bank and cheque. A completed sale prints an A4 invoice.
- Three roles, checked on the server. Reception can sell without seeing what an item cost.
- Sales, purchases, profit and loss, and stock movement export to CSV.

FRACA SERVCOM website

Live · fracaservcom.co.ke

HTML, CSS, JavaScript, Vercel, Resend

- Rebuilt the site after the old one stopped loading.
- Replaced a broken third-party form with my own contact API: it checks the input, filters spam, and sends the email.
- Each product can open a WhatsApp chat about that item, and the whole catalogue is searchable.
- An online shop is next, using the same stock records so prices are not kept in two places.

Nova, a local terminal assistant

Personal tool

Python, LM Studio

- Runs a small language model on my own machine. It can read files and run commands, and it asks before it deletes anything.

EDUCATION

Software Development, KCA University

Nairobi · Expected November 2026

LANGUAGES

English, professional
Swahili, native

COMMUNITY

DotNexxt AMA, The Tech Side of Finance. Annabel Mwangi's session on payment flows, reconciliation, settlement and liquidity, and why money is slow to settle between banks, card networks and gateways.

DotNexxt. I join the technical sessions and the mentorship classes, which cover industry readiness and how to think a product through before building it.
